

Post-doctoral opening in learning and memory laboratory: non-human primate

The non-human primate laboratory for learning and memory at school of cognitive science has an open position for a post-doctoral fellow. The research focus of the lab is on value learning and memory mechanisms in cortex and basal ganglia. The start date can be as early as Azar 1403 for an initial one year-term and extendable to five years upon satisfactory yearly review.

The ideal candidate should have a PhD in fields related to neuroscience or bioengineering. Previous experience with animal models and with electrophysiology data collection and analysis is a plus.

Interested candidates should send their CVs to khodadoostjavad.ee@gmail.com.
